

Miami Cancer Institute Radiation Oncology Presents: Improving Care and Outcomes for the Oncology Patient Receiving Radiation Therapy: Strategies for Treatment, Management and Patient

Saturday, February 10, 2018

7:30 a.m.-4:30 p.m.

Baptist Hospital of Miami Auditorium, 3 South

OVERVIEW

Knowing what to expect and how to manage radiation side effects improves the patient's perception of care and supports patient engagement, patient and family-centered care and patient compliance, all of which support the achievement of optimal care outcomes. This program will provide the foundation for healthcare providers to successfully educate patients and their families about management of the short and long term side effects of radiation treatment and strategies to improve quality of life during and after treatment. The focus will be on care of patients receiving radiation therapy for cancers of the lung, head and neck, breast, prostate and central nervous system and for gynecologic cancers.

TARGET AUDIENCE

Oncology Nurses, Oncologists, Radiation Oncologists, Hematology Oncologists, Physician Assistants, Nurses, Nurse Practitioners, Radiation Therapists, Radiologic Technologists, Social Workers, Patient Navigators and other interested healthcare providers.
